PARCO Pearl Gas (Private) Limited (PPGL), a wholly owned subsidiary of PARCO, is a trusted leader in Pakistan's LPG industry with decades of proven experience and operational excellence.

As the country's largest LPG marketing company, PPGL distributes over 200,000 metric tons of LPG annually through an extensive nationwide network of cylinder filling plants and bulk supply channels, ensuring safe, efficient, and uninterrupted energy supply across Pakistan. Serving both domestic and commercial sectors, we are committed to the highest standards of safety, quality, and reliability.

# PPGL HISTORY

**2025**

Reinforcing its commitment to operational excellence, the Lahore Plant underwent a major expansion increasing storage capacity from 240 MT to 2080 MT to enhance efficiency and strengthen the supply chain.

**2008**

With evolving energy demands, SHV expanded its B2B operations, particularly in the hospitality sector, with successful projects in Swat, Lahore, Dhodak, Peshawar, and Sahiwal. Total sales surpassed the milestone of 90,000 tons per year.

**1999**

SHV Energy, a global leader in off-grid energy solutions, acquired Lifeline, bringing international expertise and a broader perspective to Pakistan's LPG market.

**1982-83**

Lifeline became one of the pioneers in utilizing locally produced LPG, establishing processing plants at major gas fields in Dhurnal and Meyal.

**2012**

PARCO completed its acquisition of SHV Energy Pakistan, assuming full ownership. The company was rebranded as PARCO Pearl Gas (Private) Limited, marking the beginning of a new chapter.

**2010**

Strengthening its presence in northern regions, SHV established a new LPG plant in Adhi and secured allocations from the PPL Adhi Field, enhancing production capacity and outreach.

**2005**

To ensure stable supply and availability, SHV enhanced its supply chain by initiating LPG imports for the Pakistani market.

**2002**

Recognizing the sector's growth potential, SHV further expanded by acquiring local LPG company Unigas, which held a 10 MT/day allocation from the Dhodak Gas Field and operated filling plants in Dhodak and Lahore.

**2001**

SHV diversified into the B2B segment, making history by signing its first agreement with Kohinoor's newly established dyeing mill on Manga Road, Lahore.

## VISION

To keep the flame of progress & comfort running with reliability, safety & convenience across the nation.

## MISSION

Our mission is to remain the leading brand that stands for quality, safety, and reliability in the LPG sector, while protecting and safeguarding the well being of our loved ones, businesses, families, and communities.

## CORE VALUES

### CARE & COMPASSION

We are dedicated to fostering a culture of compassion and understanding, consistently demonstrating consideration, kindness & empathy towards our colleagues and partners, while providing unwavering support and a willingness to assist others.

### TRUST & INTEGRITY

We are committed to building trust & integrity in everything we do by consistently acting with honesty, reliability and ethical principles, creating a work environment where everyone can rely on us and trust in our words and actions.

### SAFETY & SUSTAINABILITY

We unwaveringly promote safety and sustainability in all aspects of our operations. This includes fostering a culture of preventative actions and consistently implementing and adhering to safety and sustainability policies. As well as taking actions that keep in mind the well-being of present and future generations.

## BRAND PROMISE

With decades of proven success, we bring a legacy built on reliability, excellence & innovation. Our unwavering commitment to safety, backed by industry-leading standards and expertise, sets us apart from every other provider in the market.

Whether you're running a business or managing a household, we offer tailor-made LPG solutions specifically designed to meet your energy needs. From industrial operations to remote residential areas, our adaptable and efficient supply chain ensures convenience and uninterrupted service.

At PARCO Pearl Gas, we don't just deliver LPG, we deliver peace of mind, and a partnership you can count on. Choose us to energize your tomorrow, safely and efficiently.

# PPGL PILLARS

## Quality

We are committed to delivering superior quality by utilizing premium materials & cutting-edge technology to ensure reliability & performance in every product.

## Safety

PARCO PEARL rigorously adheres to global safety standards, ensuring each product surpasses international safety protocols for maximum protection.

## Availability

PARCO PEARL guarantees widespread availability with a robust distribution network and efficient supply chain management, ensuring our products are accessible whenever needed.

## Convenience

We enhance user convenience with service quality and easy to use products, flexible payment options and responsive customer support, simplifying energy solutions for all.

## Reliability

We ensure consistent reliability through stringent operational protocols & continuous performance monitoring, delivering dependable energy solutions every time.

## Service Standards

We maintain superior LPG service standards by providing timely deliveries, expert installation and proactive maintenance ensuring reliable and safe energy access for every customer.

## NATIONWIDE PRESENCE

PPGL has one of the most geographically diversified networks in the country, with seven filling plants along with three gas distribution centres across Pakistan.

# LPG

LPG is recognized as an environmentally friendly fuel, with significantly lower greenhouse gas emissions compared to other fossil fuels throughout its entire lifecycle. Its non-toxic nature ensures no risk of soil or water contamination in the event of a leak. Additionally, LPG offers superior energy density, with a higher energy content and calorific value per unit compared to fuels like coal, natural gas, diesel, petrol, fuel oils, and biomass-derived alcohols.

## LPG APPLICATIONS

## BENEFITS OF LPG

LPG is also known as one of the most multi-faceted energy sources with versatile uses across numerous sectors.

# BUSINESS SEGMENTS

## DOMESTIC

### HOME SOLUTIONS

At PARCO Pearl Gas, we go beyond LPG delivery — offering complete energy solutions for your home. From OGRA-certified safe and reliable doorstep delivery of cylinders to certified accessories, including regulators, hoses, burners, and more, we ensure your household's energy needs are met effortlessly. Our expert staff not only installs cylinders and accessories but also guides customers on safe usage, empowering you with knowledge and confidence. Whether it's everyday cooking, outdoor activities, or small-scale needs, Pearl Gas provides convenient, trustworthy solutions your family can rely on.

### DIGITAL PLATFORMS

PPGL is committed to making our products easily accessible to customers nationwide through our dedicated e-commerce platform and MyPearl app.

Our user-friendly platforms allows customers to browse, select, and place orders online with ease, ensuring a seamless shopping experience from the comfort of their homes or offices. By integrating modern digital solutions, we provide real-time product availability, secure payment options, and timely delivery, reflecting our dedication to convenience, reliability, and customer satisfaction.

### LPG OUTLETS

PPGL takes pride in its extensive distribution network, with LPG outlets strategically located in key cities across Pakistan. Our outlets ensure that our products are easily accessible to customers. LPG Outlets strengthens our customer reach, reinforces brand reliability, and supports our mission to provide seamless service across the country.

## COMMERCIAL

### SEAMLESS ENERGY SOLUTIONS

Pearl Gas offers a convenient and user-friendly solution through its commercial cylinder manifolds. These compact systems are designed for easy installation, even in limited or confined spaces, making them ideal for a wide range of commercial and industrial applications.

The manifold systems ensure a consistent and uninterrupted supply of gas, allowing businesses to maintain smooth operations without disruptions. With enhanced flexibility in safety protocols and streamlined maintenance, these systems provide both efficiency and peace of mind.

### HOSPITALITY SOLUTIONS

Pearl Gas empowers businesses with efficient and dependable LPG solutions. We cater to a variety of commercial needs, from high-consumption restaurants and eateries to businesses with unique space constraints, ensuring a consistent and reliable LPG supply for seamless operations.

### HOTELS & RESTAURANTS

LPG is a versatile fuel source with numerous applications in the HoReCa industry. It powers cooking equipment, heating systems, water heaters, refrigeration units, and laundry facilities. By providing reliable and efficient energy, LPG helps businesses maintain high standards of service, improve operational efficiency, and enhance overall customer experience.

## 45.4KG CYLINDER MANIFOLD

45.4KG Manifolds are multi-cylinder gas systems that connect multiple LPG cylinders to a single supply point. They deliver higher pressure, increased flow, and an uninterrupted gas supply, making them ideal for commercial and industrial users with high consumption. This system minimizes downtime, reduces the need for frequent cylinder changes, and ensures safe, efficient, and reliable operations. It also allows better load management and consistent performance during peak demand.

## 200KG CYLINDER MANIFOLD

200KG manifold cylinder installations offer a practical and efficient alternative to bulk LPG tank systems, especially in locations where space is limited. These installations use multiple cylinders connected through a manifold system, providing a continuous and reliable gas supply. They are particularly suitable for sites where large bulk tanks cannot be accommodated or where access for road tankers is restricted. By combining portability with high capacity, 200KG manifold systems ensure uninterrupted operations while maximizing space efficiency and safety.

## DISTRIBUTION

### RETAIL SOLUTIONS

Parco Pearl Gas operates one of the largest and most strategically positioned LPG distribution networks in Pakistan, ensuring safe, reliable, and timely access to gas across the country. With nearly 500 distributors nationwide, the company is able to supply households, commercial businesses, and industrial operations, regardless of location. This extensive network enables Pearl Gas to maintain uninterrupted supply, even in remote or hard-to-reach areas.

By leveraging its diverse geographic footprint, Pearl Gas bridges the energy gap and meets Pakistan's growing LPG demand efficiently. The network not only guarantees availability and convenience for customers but also supports rapid response to emergencies, bulk supply needs, and high-demand periods. Through this robust distribution system, Pearl Gas ensures that quality, safety, and reliability remain at the forefront of its service, making it a trusted energy partner for consumers nationwide.

## BULK BUSINESS

PPGL caters the energy needs of industrial customers by supplying Pearl Gas in LPG tanks, installed & invested by PPGL at customer premises. Pearl Gas is safely replenished in bulk tanks through an efficient fleet of Company owned & operated LPG road tankers.

These industrial customers are normally using other fuels including Furnace Oil, Kerosene, High Speed Diesel (HSD), Light Diesel Oil (LDO), Electricity or Natural Gas but want uninterrupted, economical and reliable supplies of Pearl Gas.

The company also provides technical support and guidance for conversion of equipment from alternate fuel sources to Pearl Gas. The bulk tank(s) installations are engineered to international standards and comply with a very high safety regime.

# BULK TANKS

Our commitment to meeting the diverse storage needs of our clients is reflected in our comprehensive range of solutions. For businesses with limited space and moderate consumption requirements, we offer compact and efficient options ideal for applications restaurants, small-scale industries, and paint shops.

We provide storage solutions extensively used in industries with moderate to high demands, such as ship breaking yards, paint shops, and large-scale industries. These high-capacity solutions ensure a continuous supply, making them indispensable for businesses with significant energy requirements, including production plants, boilers, melting furnaces, and large-scale paint shops.

## OUR RANGE OF BULK STORAGE:

1 Metric Ton

2 Metric Ton

5 Metric Ton

## LPG VAPORIZERS

Liquefied Petroleum Gas (LPG) vaporizers are critical components in bulk LPG installations, designed to convert liquid LPG into vapor form in a controlled and efficient manner. At PPGL, we specialize in engineering, installation, and operation of high-performance LPG vaporizer systems tailored to diverse industrial and commercial applications.

### 1. ELECTRIC VAPORIZERS

Precise control, compact design, suitable for small to

### 2. WATER BATH VAPORIZERS

Uniform heating, high capacity, widely used in industrial

### 3. DIRECT-FIRED VAPORIZERS

High output but requires strict safety controls.

### 4. STEAM/HOT WATER VAPORIZERS

High efficiency for plants with steam/Hot water availability.

## FLT CYLINDERS

FLT Cylinders are 18 kg LPG cylinders specifically engineered for Fork Lift Trucks in industrial and commercial settings. They offer a clean, efficient, and environmentally friendly fuel alternative compared to conventional fuels like diesel, helping businesses reduce emissions and support sustainability goals.

Designed for safety and reliability, FLT cylinders ensure consistent performance, long operational hours, and easy refueling, which minimizes downtime in busy warehouses, factories, and distribution centers.

# THE LOW CARBON, SUPER-EFFICIENT FUEL FOR YOUR BUSINESS

## A COMMITMENT TO A GREENER FUTURE

At PARCO Pearl Gas, we recognize the critical importance of integrating sustainable practices into every aspect of our operations. Our approach is centered on minimizing environmental impact while maintaining operational excellence and regulatory compliance. By continuously improving the efficiency of our fleet and monitoring key environmental indicators, we aim to contribute meaningfully to a cleaner, more sustainable future. Our commitment extends beyond compliance; it reflects our dedication to responsible corporate citizenship and long-term value creation for all stakeholders.

## SUSTAINABLE PRACTICE

**20%** Lower CO<sub>2</sub> Emissions **50%** Less CO<sub>2</sub> than Coal

**90%** Reduction in Indoor Air Pollution **0.001%** Sulphur Content

## ANNUAL ENVIRONMENTAL COMPLIANCE TESTING

We conduct comprehensive annual testing of all vehicles to ensure full compliance with effluent discharge and emission standards. This proactive approach reinforces our commitment to regulatory adherence and environmental stewardship.

## MILEAGE OPTIMIZATION EFFORTS

We actively pursue initiatives to optimize vehicle mileage, thereby reducing our carbon footprint and operational costs. Through strategic route planning and performance monitoring, we aim to drive both environmental and financial efficiencies.

**Cut Your Carbon  
Footprint**

Switching your business energy supply from oil to Pearl Gas can lower your CO<sub>2</sub> emissions by up to 17.8%

**Keep Yourself  
Compliant**

Pearl Gas can help to keep you on the right side of environmental regulations

**Power Anything  
& Everything**

Pearl Gas LPG is versatile. It can create heat and electricity, boil, steam, sterilise, dry - and more.

# ENGINEERING SERVICES

Pearl Gas specializes in industrial solutions and value-added services, along with a range of support offerings including:

Design and Drafting Services

Pipe Sizing

Site Audits

Burner Efficiency Optimization

Complaints Handling

Consultancy

Maintenance

# CUSTOMER ON-BOARDING STEPS

Sales and Customer Engineering Team visits the site for site surveying, assessment of Customer Applications & Propose needed solutions.

PPGL/Engineering Team prepares the site's layout with the customer's coordination and PPGL/Corporate team assists in filing for the 'Explosive Licenses'.

The Engineering Team installs the LPG tanks after getting construction approval.

'Explosive License' is received and site is filled with due coordination of the customer and PPGL Customer Service, Supply Chain and Engineering.

The Engineering Team commissions the LPG system during the First Fill.

Training is provided to staff on proper LPG handling and management.

# QUALITY ASSURANCE

## LPG QUALITY CHECKS

At PARCO Pearl Gas, we prioritize the quality of our product (i.e., LPG) to ensure the highest standards of safety and performance. Our rigorous quality control process involves multiple checks throughout the day.

We utilize hydrometers to measure the specific gravity of our LPG, ensuring it meets the required standards. We obtain samples from inbound bowsers to verify their specific gravity and acceptability.

To ensure the highest quality of our LPG, we engage accredited third-party laboratories to conduct tests in line with GPA standards. These tests measure sulfur content, specific gravity, and Reid vapor pressure, providing an additional layer of assurance.

By upholding these quality control measures, we reaffirm our commitment to delivering high-quality LPG that meets the the highest standards and fulfills our customers' expectations.

## CYLINDER QUALITY CHECKS

We recognize the importance of ensuring the integrity and safety of our LPG cylinders. To achieve this, we undertake a-rigorous cylinder quality checks at our plant.

Our cylinders are manufactured as per international DOT and EN standards, with a detailed third-party inspection at each manufacturing stage, ensuring best quality.

Every cylinder that arrives at our facility undergoes a thorough physical inspection. Trained personnel examine each cylinder for signs of damage, such as:

1. Damaged or faulty valves
2. Missing or damaged shrouds
3. Base ring damage

If a cylinder fails to meet our quality standards & procedure requirements, it is promptly rejected and removed from service. Only cylinders that pass the inspection process are filled and dispatched to our customers.

## ACCURACY IN WEIGHT MEASUREMENT

Accuracy in weight measurements is ensured through strict quality controls such as weigh scale calibrations from recognized third parties guaranteeing that customers receive the exact quantity they require.

## CUSTOMERS SITE QUALITY CHECKS

Our dedicated team works closely with customers to ensure that our LPG products meet their specific requirements and are handled safely.

We consider the unique demands of each customer's application, whether it's propane or butane. Our experts provide guidance on product usage, safety protocols, and training programs to ensure seamless integration with our customers' operations.

Through regular site visits and collaborative support, we empower our customers to handle our LPG products with confidence and safety. By sharing our expertise and promoting best practices, we foster long-term relationships.

## CYLINDER REQUALIFICATION PROCESS

This critical program ensures that our cylinders remain fit for service throughout their lifespan.

After ten years of service, our cylinders undergo a comprehensive requalification process. This involves:

1. Tracking cylinders throughout their life cycle to ensure timely requalification
2. Transporting cylinders to our dedicated requalification facility
3. Conducting thorough inspections and tests to assess cylinder integrity
4. Performing necessary repairs or maintenance to ensure cylinder safety and reliability
5. Certifying cylinders that pass the requalification process for continued service

## HEALTH, SAFETY & ENVIRONMENT (HSE)

At PARCO Pearl Gas, we believe that, Company's long-term business success depends on our ability to continually improve HSE performance by protecting people, including stakeholders, assets, the environment & reputation of the Company. Therefore, towards our Vision of "Zero Harm", Health, Safety, and Environment matters are considered as an integral part of our business processes and shall be duly taken into account for guiding our behaviors, actions and decisions for achieving HSE excellence in all operations.

### HSEQ POLICIES

Health, Safety and Environment matters are considered as integral part of our business processes and shall be duly taken into account for guiding our behaviors, actions and decisions for achieving HSE excellence in all operations covering Hydrocarbons Refining, Transportation, Storage & Marketing.

### HSE MANAGEMENT SYSTEM

To ensure adherence to HSE standards, PARCO has established a comprehensive Health, Safety, and Environmental Management System (HSEMS). This system provides a structured framework for effectively managing HSE throughout the company and its subsidiaries and acts as a guiding umbrella for all safety-related initiatives within PARCO.

### ENVIRONMENT

PARCO continuously endeavors to introduce clean fuel technologies and Environment Management Systems to contribute to the balance of the ecosystem. The ultimate objective is to eliminate any negative environmental impact caused by the company's operations.

## Pearl Gas has Helped Thousands Switch To Cleaner, Greener LPG

### QUALITY POLICY

PARCO Pearl Gas, towards its Vision of operational excellence, places Quality Assurance & Control as an integral part of corporate governance through leadership commitment for continual improvement in all its value chains and functions covering Hydrocarbons Refining, Transportation, Storage & Marketing business.

# OUR LOGISTICS

## TRANSPORTATION FLEET

Pearl Gas operates a robust transportation network with a fleet of 70 tank trailers boasting a cumulative capacity of 1,560 MT of mobile storage. This ensures uninterrupted LPG supply from sources to filling plants or directly to customers. Additionally, we maintain a dedicated cylinder delivery fleet catering to Contractual Commercial Cylinder (CCC) customers and domestic users.

## STRATEGIC DELIVERY NETWORK

LPG is transported from key sources to strategically located filling plants and hospitalities across the country, where it is bottled and distributed through our extensive network of distributors.

Our fleet of tankers delivers LPG to industrial and commercial customers, utilizing pumping systems and market-leading digital metering technology from M/s Liquid Controls. This guarantees accurate product delivery, enhancing customer satisfaction.

Our cylinder delivery services ensure timely and efficient supply to CCC customers and domestic users, solidifying our position as a trusted partner in energy solutions.

## SAFETY COMMITMENT

Safety at Our Core: We follow strict protocols and international standards to protect customers, employees, and communities. Our tankers comply with OGRA and Explosives Department regulations and are equipped with UL-listed safety systems. Vehicles are monitored 24/7 using GPS, DMS, ADAS, and MDVR with AI and human oversight. Drivers undergo continuous training, monitored driving practices, and follow full PPE and emergency procedures. Expert engineers ensure regular maintenance and operational reliability.

## TECHNOLOGY AND INNOVATION: DRIVING PROGRESS

LPG is transported from key sources to strategically located filling plants and hospitalities across the country, where it is bottled and distributed through our extensive network of distributors.

Our fleet of tankers delivers LPG to industrial and commercial customers, utilizing pumping systems and market-leading digital metering technology from M/s Liquid Controls. This guarantees accurate product delivery, enhancing customer satisfaction.

Our cylinder delivery services ensure timely and efficient supply to CCC customers and domestic users, solidifying our position as a trusted partner in energy solutions.

## MILEAGE: A MEASURE OF TRUST AND DEDICATION

Every year, PARCO Pearl Gas covers an impressive 8 million kilometers ensuring safe and efficient LPG deliveries to our valued customers. Our trained crew works tirelessly to deliver gas on time, upholding our commitment to reliability and safety.

# LIFE AT PPGL

## EMPOWERING HUMAN CAPITAL

People are at the heart of everything we do. Our workforce is the driving force behind our success, and we invest in their growth through a dynamic and inclusive work environment. From onboarding to leadership development, we offer a wide array of learning opportunities that inspire and empower. Through regular engagement and mentorship, we create a space where employees are encouraged to take initiative, share ideas, and grow both personally and professionally.

## TRAINING THAT TRANSFORMS

At PARCO Pearl Gas, learning never stops. Our comprehensive training programs are designed to keep our team equipped with the knowledge and skills they need to succeed in a rapidly evolving energy market. Key programs include:

In-House  
Training Modules

Leadership & Change  
Management (LCM) Bootcamps

HR Connect  
Sessions

## LEADERSHIP COMPETENCY MODEL

### STRATEGIC FOCUS

- Strategic Mindset
- Plans & Aligns
- Decision Making

### COLLABORATION

- Drives Engagement
- Inclusive Communication
- Succeed Together

### OWNERSHIP

- Accountability
- Drive for Results
- Speed & Agility

Through cross-functional training, leadership development workshops, and ongoing performance coaching, we help our team discover their strengths and grow into roles of greater responsibility. Our culture promotes collaboration, adaptability, and innovation — enabling our employees to deliver excellence in service, safety, and sustainability.

## COMMITTED TO A BRIGHTER FUTURE

We are proud to be more than just an LPG provider. At PARCO Pearl Gas, we fuel not just homes and industries, but also the aspirations of our people. With a strong focus on employee well-being, career growth, and environmental stewardship, we're building a future that's cleaner, more efficient, and filled with opportunity for all.

## LIST OF KEY CUSTOMERS
